

## FLOOR COATINGS

### Toughseal Liquid Plastic Protection

A single pack polymer coating with tremendous flexibility and chemical resistance. Can be used on all types of surfaces such as concrete, wood and steel.

This system is available in coloured or clear. The clear version can be used as a primer on porous surfaces and is excellent as a protective barrier on wood and sealing dusty concrete.

Coverage: 6 - 8 square metres per kg depending on porosity.

- Excellent chemical resistance
- Very hard wearing
- Tremendous gloss
- Easy to apply
- Very flexible
- Quick drying

Standard Colours

Other colours can be manufactured to order.  
Also available in clear.

### Floorclad Molecular Protection System

Based on our Epoxy Macro Molecular Technology, Floorclad has very low odour, is foodsafe when cured. Can be applied to damp surfaces.

- Glass flake reinforced protection
- Foodsafe when cured
- Excellent chemical resistance
- Tremendous adhesion
- Solvent free
- Very low odour during application
- Can be applied over existing coatings
- Will adhere to damp surfaces

Coverage: 5 - 6 square metres per kg

Standard Colours

Other colours can be manufactured to order.
