

DURA QUARTZ SYSTEMS

All of the products in the Dura Quartz range are based on the latest synthetic resin technology combined with our computer graded quartz aggregate.

Dura Quartz is available in three grades:

- Dura Quartz
- Dura Quartz Rapid
- Dura Quartz Sub Zero

Dura Quartz

The ultimate answer to concrete repairs in areas of high wear, floor movement and chemical or effluent attack. In addition this product is ideally suited to repairs on concrete structures, street furniture, etc.

- Compressive strength of 7-8000 LBS PSI
- Excellent chemical resistance
- Tremendous adhesion
- Does not shrink

Dura Quartz - Rapid

Dura Quartz Rapid has the same strength as Dura Quartz with the benefit of rapid curing.

- Cures in 2-4 hrs

Dura Quartz - Sub Zero

Widely acclaimed wherever sub zero repairs are required. Dura Quartz Sub Zero has the same properties as the standard Dura Quartz, has tremendous strength and will cure in temperatures as low as -40°C.

- Will cure below zero degrees
- Very low odour
- Excellent chemical resistance
- Does not shrink
