

## NON-SLIP SYSTEMS

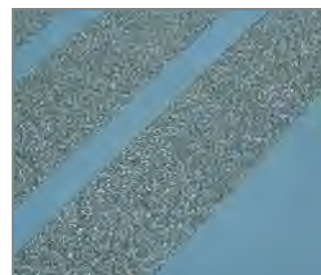

### Robex Grip Kits

Robex Grip Kits have prevented accidents on slippery surfaces around the world for over 20 years. Widely used, not only for pedestrian traffic but also vehicles, forklift trucks and automated handling systems.

Can be used on steps, ramps, walkways, fire escapes, upper surfaces of pipes and tanks, pool edges, cab steps, platform edges, level crossings and gantries.

Uses specially graded calcined bauxite which does not wear smooth and retains its grip properties for years.

- Will adhere to virtually all building surfaces
- Exceptionally hard wearing
- Supplied in kit form for ease of use
- Available in fine or coarse aggregate
- Tremendous adhesion
- Excellent chemical stability
- Available in a range of colours

### Multi Grip

Developed as a safety non-slip system for large areas. Multi Grip incorporates the same Bauxite Aggregate as the Robex Grip Kits.

Based on our Macro Molecular Technology (as used in our High-Build Floor Coating Systems) the Multi Grip Resin is easily applied by brush or roller and is then 'dressed' with bauxite aggregate to create a hard wearing industrial safety non-slip finish.

- Easy to apply by brush or roller
- Good flexibility
- Excellent waterproofing qualities
- Very hard wearing
- Available in kits
- Bonds to most surfaces
