

## CeraGuard

KILLS LIFE THREATENING BACTERIA QUICKLY,  
EFFECTIVELY AND PERMANENTLY.

### High performance anti-bacterial coating

Robex Cera Guard© systems use the latest coating technology combined with glass flake protection & anti-bacterial properties to provide a range of fluid applied coating systems providing the ultimate seamless protective barrier.

#### Foodsafe Coating System for Walls Cera Guard 3000

A fluid applied high performance molecular resin anti bacterial coating for walls. Based on our E.P. Macro Molecular Technology, Cera Guard 3000 incorporates glass flakes for extra strength and chemical resistance.

Cera Guard 3000 is easy to clean, has fantastic adhesion to almost any surface and is foodsafe when cured.

- Hard wearing seamless barrier
- Adheres to damp surfaces
- Solvent free
- Low odour
- Tremendous adhesion
- Foodsafe

Standard Colours

Other colours can be manufactured to order.  
Cera Guard is also available in clear.

#### Foodsafe Coating System for Walls & Specialist Areas Cera Guard 5000

The ultimate, seamless foodsafe coating system for walls and other specialist areas such as hand basins and baths.

The system contains reinforced glass flakes which combine with a liquid plastic resin to provide a highly impervious protective barrier.

Cera Guard 5000 can be applied to almost any surface, including glazed tiles, brick, concrete, plaster, wood, etc. Resistant to oils, fats and greases and a wide range of chemicals. Cera Guard 5000 will not discolour in UV light.

- Kills life threatening bacteria
- Foodsafe when cured
- Excellent chemical resistance
- Very flexible
- Will not discolour
- Easy to clean
