

METAL REPAIRS

Metal System Repair Kits

A range of easy to use products for repairing and preserving metal parts and components. Whether an emergency repair or long term reclamation, there is a product to meet the problem.

All of our metal repair kits contain everything you need to carry out repairs on-site, including mixing bowls, spatulas, cleaner, etc.

Robex Metal Systems are supplied in three grades:

Premier Metal

Fluid Metal

Rapid Metal

- Easy to use 1-1 mix
- Tremendous adhesion & compressive strength
- Excellent chemical resistance

Robex Steel Epoxy Repair Sticks

Repair Sticks are based on our metal resin technology. The base and reactor are combined in an easy to use stick, you simply cut off the required amount and mix by hand then apply to the surface. Will not slump or drip, bonds quickly to most metals including, steel (high and low carbon), aluminium and most other alloys.

Ideal for filling cracks in castings and rebuilding broken metal parts, gearboxes, engine housings, differential housings and machine cases etc. Repairs stripped threads, eliminates the need for expensive welding, can be drilled, filed, tapped, ground, sanded and painted when cured.

Steel Epoxy Repair Stick is ideal for emergency repairs to metal.

- Easy to use - no tools required
- Sets rapidly

UNDERWATER REPAIRS

Underwater Epoxy Repair Stick

Very easy to use. Simply cut the required amount of putty from the stick, mix in the hand then apply to the surface. Will not slump or drip.

Bonds quickly to most plastics including, ABS, polyurethane, PVC, acrylic, polycarbonate and some polyolefin materials. Ideal for filling cracks and holes in broken plastic parts, bumpers, trims, GRP mouldings, canoes, boats etc. Works underwater, eliminates the need for expensive plastic welding, can be drilled, filed, ground, sanded and painted when cured.

- Will bond underwater
- Easy to use - no tools required
- Sets rapidly
