

Robex S.A. SOLVING PROBLEMS THROUGHOUT THE WORLD!

Robex, as a company have over 100 formulations for specialist maintenance products, which are designed to make a difference to the customers that they serve!

We are a company who offer a unique service, due to the fact that we manufacture; supply and apply these specialist products. This allows us to afford the company a one point of responsibility service to the client, where there can be no transferring the blame in cases where the client experiences a problem!

Robex as a company have been represented in South Africa since 1991 during which time they have built and maintained a credible company image, serving some of South Africa's most reputable companies. We have achieved this by providing world class products coupled with an application team which consists of a Technical Manager; Projects Manager; Project Manager; Stores Manager and 7 teams of fully trained and competent site foremen and applicators. We also have a sales team which are capable of covering the whole of South Africa, offering technical advice and support!

Industrial Needs

The preparation, cooking and serving of food and beverages for human consumption must be conducted in a hygienic environment. Now more than ever working surfaces in food preparation areas are under scrutiny.

Essential requirements

- All surfaces must be easy to clean and sterile.
- Aesthetics must be pleasing and surface finishes light coloured.
- Preparation and processing areas must be non-slip under wet conditions.
- Surfaces must be able to withstand aggressive cleaning and sterilizing regimes including steam cleaning.
- Floor surfaces must be laid to effective drainage.
- Floor surfaces must be tough and durable, able to withstand foot traffic and steel wheeled trolleys.
- Surfaces must be non-staining, non-dusting and biologically inert.
- Vertical and horizontal interfaces need to be seamless.
- Drains and sumps need to be lined and allow free flow of spillage.

TRACK RECORD...
Thousands of square meters laid and hundreds of job references are testimony to the quality and suitability of Robex Food Safe System for use in kitchens.

Ready for
use in
2 hours!

*...always a little faster!
...always state-of-art solutions!*

ROBEX "FOOD SAFE" MMA resins offer distinct advantages to owner / specifiers, engineers and contractors alike:

• Owner / Specifier

- Fast turnaround
- High chemical and biological resistance
- High resistance to impact and mechanical wear
- Non-absorbent surfaces
- Long service life
- Seamless, smooth or non-slip surfaces
- Highly decorative finish
- May be applied at subzero temperatures
- Overnight installations possible
- Can be applied on old and new substrates of concrete, ceramic tiles and wood.
- Suitable for steam cleaning

• Engineer

- Fully bonded - reduces risk of detachment / impact / tracking
- Wide temperature range of application
- May be applied at varying thicknesses
- Semi-flexible
- One system for vertical and horizontal applications
- Various degrees of non-slip finish can be created

• Contractor

- Rapid application, up to 250 - 500 m² per day (1 crew)
- Applied in the widest range of climatic conditions (-30°C to +35°C)
- Problem solving solution for clients
