

# A BIG DELIVERY arrived at Canners!

The new Blow Molder on Line 6 has finally arrived from Krones in Germany! The installation started on 24 September and will last for the next few weeks. The entire Manufacturing area of Line 6 has been removed to accommodate the new Blow Molder.

A big thank you to everyone who contributed to ensuring that the project timelines were in perspective; in particular Robex, who worked during night shift over the weekend to level out the epoxy coat on the floor area.
